TAKE Secondhand Smoke Kills ACTION

All workers should have
a right to work in a
smoke-free environment.

Protect Yourself TAKE ACTION!

Boulder CO 80303

Death by secondhand
smoke shouldn't be
a condition of
our employment.

- It doubles our risk of getting lung cancer and heart disease.
- It increases the risk of breast cancer for young women.
- It exposes us to more than 60 cancer-causing chemicals, and ventilation systems can't remove them all.
- It causes eye irritation, coughing, sore throats, and more.
- It makes us sick!
